Project Name	Voice Based Concept Understanding Analyser
Maximum Marks	4 Marks

Empathy Map

Create an empathy map to understand your customer/user from four perspectives - what they Say, Think, Do, and Feel - in relation to the problem your project addresses. This helps the team build a customer-centric solution.

• I want to know if I really understand the concept. • I need instant feedback on my spoken explanation.	• If my explanation is inaccurate, I need to know why. • I want AI to evaluate conceptual understanding, not just speech. • Quick feedback will help me improve.
	College Student Explaining Concepts Verbally

- Explains concepts aloud.
- Uses voice-based practice before exams.
- Reviews AI feedback to improve.

- Confident when my explanation is correct.
- Frustrated when I cannot judge my understanding.
- Motivated by instant AI-based feedback.
